

ROHS AND WEEE STATEMENT

EU RoHS and WEEE Directives

The Directive 2011/65/EU on the Restriction of the use of certain Hazardous Substances (RoHS II), replacing Directive 2002/95/EC (RoHS I), targets electrical and electronic equipment to avoid adverse impacts on human health and the environment.

Cyclops Electronics Limited ("Cyclops") is aware of and supports the RoHS directive and as an electronic component stocking distributor, is unable to make any claims of the material content of the product(s) that another company manufactures.

Cyclops distributes a wide selection of electronic components, including both RoHS and non-RoHS compliant products. When selecting electronic components, customers should check their requirements and the compliance of individual parts directly with the component manufacturer.

Where possible, Cyclops will display the RoHS status on quotes, delivery notes and invoices. RoHS status information is based solely on information provided to Cyclops by the manufacturer, manufacturers' distributor or via our supply chain. Cyclops is not responsible for the accuracy of this information.

RoHS II is a partner directive to the Waste in Electrical and Electronic Equipment (WEEE) Directive that controls the disposal and recycling of electrical and electronic equipment.

Cyclops supports the WEEE Directive and takes due diligence to ensure we arrange collection, recycling and environmentally safe disposal of our WEEE, in line with our company Environmental Policy.

For additional information regarding the RoHS II and WEEE Directives, please visit the European Commission's website: http://ec.europa.eu/environment/index_en.htm
