Intel

On an on-going basis, Cyclops provide great customer support and focus, but this week they definitely went "over and above" what we normally would expect to service our urgent needs. At Intel we have a set of "Intel" values that govern the way we conduct business and define our culture. One of the 6 core values is Customer Orientation. Cyclops clearly role modelled this core value by their superb focus on our immediate need. Due to the extra effort to make sure these connectors were hand carried to the Airport, providing the air way bill number, and interfacing directly with Malaysia, our lines are back up and our product is shipping.
